

Rolf PowerFlame Brick White

M470WH2-23PF1A

Description

Rolf is an electric fireplace like no other. Its body is formed as a single piece from Lightstone®, a composite ceramic that's cold to the touch—much like concrete or bricks. Having no joints, it's super durable and offers an authentic, seamless look.

Every mantel is handcrafted and hand-painted, ensuring each one has its own distinct charm. The natural wooden top in antique oak provides a warm contrast and is also hand-finished for a genuinely vintage effect.

All season: Works with or without heat.

Materials: Lightstone® ceramic composite and natural pine wood.

Assembly: Delivered in 2 boxes. The mantel comes fully assembled.

Remote control: Makes the fireplace work like magic.

Dimensions

Width: 110 cm

Height: 100 cm

Depth: 35 cm

Delivered in two boxes:

117 x 109 x 40 cm, 39 kg

66.5 x 56 x 21 cm, 10.8kg

Energy Consumption

Flame only: 6.5Wh - less than a light bulb.

Flame + heating: 1500Wh - like a regular electric heater. It can heat up a 30m² room.
